**CORPORATE PRESENTATION
DECEMBER 2024**

AIM : PXEN

DISCLAIMER

This Presentation does not constitute or form part of any offer for sale or solicitation of any offer to buy or subscribe for any securities nor shall it or any part of it form the basis of or be relied on in connection with, or act as any inducement to enter into, any contract or commitment whatsoever or constitute an invitation or inducement to engage in investment activity under section 21 of the UK Financial Services and Markets Act 2000.

No representation or warranty, express or implied, is made or given by or on behalf of the Company, its advisers or any of their respective parent or subsidiary undertakings or the subsidiary undertakings of any such parent undertakings or any of the directors, officers or employees of any such person as to the accuracy, completeness or fairness of the information or opinions contained in this Presentation and no responsibility or liability is accepted by any person for such information or opinions. No person has been authorised to give any information or make any representations other than those contained in this Presentation and, if given and/or made, such information or representations must not be relied upon as having been so authorised. The contents of this Presentation are not to be construed as legal, financial or tax advice. The information has not been verified nor independently verified by the Company's advisers and is subject to material updating, revision and further amendment.

Forward-Looking Statements. Information contained in this Presentation may include 'forward-looking statements'. All statements other than statements of historical facts included herein, including, without limitation, those regarding the Company's financial position, business strategy, plans and objectives of management for future operations (including development plans and objectives relating to the Company's business) are forward-looking statements.

Such forward-looking statements are based on a number of assumptions regarding the Company's present and future business strategies and the environment in which the Company expects to operate in future. Actual results may vary materially from the results anticipated by these forward-looking statements as a result of a variety of factors. These forward-looking statements speak only as to the date of this Presentation and cannot be relied upon as a guide to future performance. The Company expressly disclaims any obligation or undertaking to disseminate any updates or revisions to any forward-looking statements contained in this Presentation to reflect any changes in its expectations with regard thereto or any change in events, conditions or circumstances on which any statement is based.

The Company's ordinary shares have not been registered under the US Securities Act of 1933, as amended (the Securities Act) and may not be offered or sold in the United States absent registration or an exemption from the registration requirements of the Securities Act. No public offering of the ordinary shares is or will be made in the United States. In addition, the Company's ordinary shares have not been and will not be registered under the applicable laws of Australia, Canada, Japan and South Africa and, subject to certain exceptions, may not be offered or sold within Australia, Canada, Japan or South Africa or to any national, resident or citizen of Australia, Canada, Japan or South Africa.

OVERVIEW

UNLOCKING POTENTIAL IN EUROPEAN NATURAL GAS, POWER AND RENEWABLE ENERGY

- AIM listed energy investor with a focus on onshore Europe (AIM:PXEN)
- Three non-operated revenue generating onshore producing gas investments with low operational risk:
 - Selva Malvezzi, Italy
 - El Romeral gas to power plant, southern Spain
 - Viura Gas Field, northern Spain
- Tesorillo Exploration Permit, southern Spain
- Licence applications in progress onshore Poland
- Cash generative
- Debt free
- Positioned for growth

Assets in **yellow** are in production

EXPERIENCED BOARD & MANAGEMENT

Focused on maximising returns from Prospex's established portfolio whilst identifying low-risk growth opportunities that have the potential to generate shareholder value

ITALY, SELVA MALVEZZI

Prospect owns a 37% Working Interest in the Selva Malvezzi Production Concession in the Po Valley Italy, which contains the Selva field

(63% : Po Valley Energy – ASX:PVE)

SELVA MALVEZZI PRODUCTION CONCESSION PO VALLEY (CONTAINS SELVA FIELD)

Selva Malvezzi is an approved production concession with an area of 81 km²

July 2022

- Production Concession granted by the Regulator

Feb 2023

- 12-month environmental baselines for seismicity before gas production completed

May 2023

- Fully automated gas plant installation and 985m 4-inch pipeline connecting the well to the grid

4 July 2023

- Selva Field first gas production started

Current

- Permits to drill four follow-on wells being progressed

Ownership:

- 37% owned by Prospex (AIM:PXEN)
- 63% owned by the operator Po Valley Energy Ltd (ASX:PVE)

The Podere Maiar-1 well at Selva (PM-1) was drilled in 2017

- Daily production of ~80,000 standard cubic metres per day (scm/d)
- Selling gas to BP Gas Marketing delivered to the national grid operated by SNAM

NORTHERN ITALY – SELVA MALVEZZI GAS PRODUCTION CONCESSION

- Prospect owns a 37% Working Interest in the Selva Malvezzi Gas Production Concession in the Po Valley Italy, comprising the Selva field
- 63% is owned by Po Valley Energy (ASX:PVE)
- Podere Maiar – 1 (PM-1) Well drilled in 2017
- Construction and connection of PM-1 completed in May 2023
- First Gas 4 July 2023
- Present Daily Production: $\approx 80,000$ scm/d
- 4 new wells planned to be drilled in 2025

Well site & Processing Plant Near Bologna

Nitrogen, Compressed air and water tanks

Dehydration Columns

Separator and Control Panel

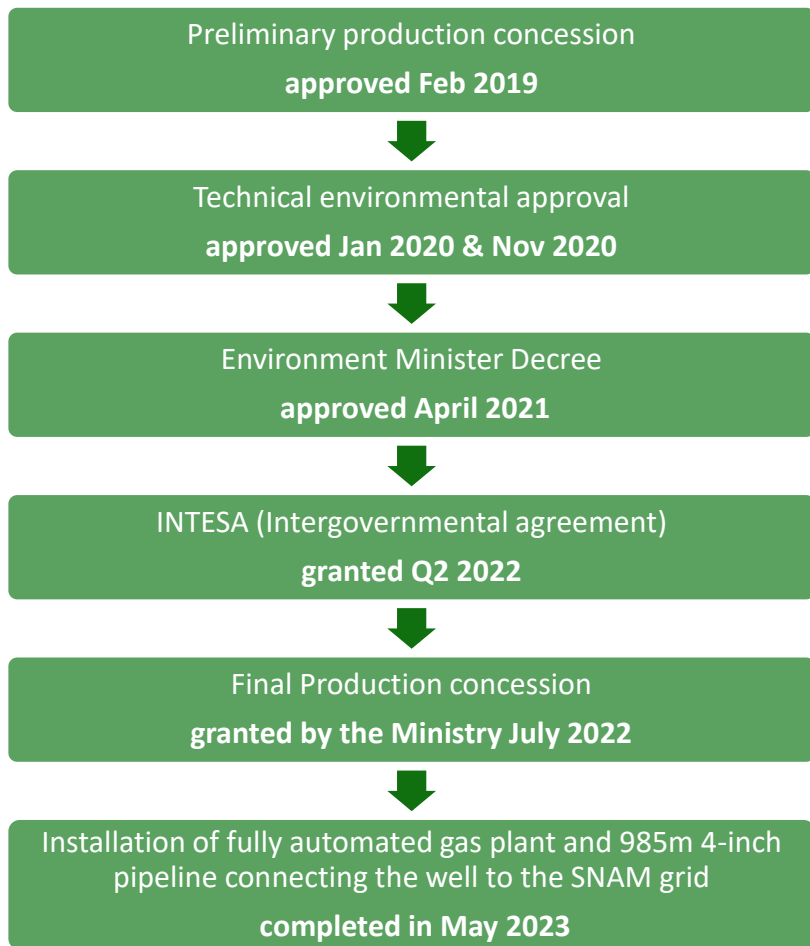

PM-1 Wellhead

SELVA GAS PRODUCTION

Route to Production

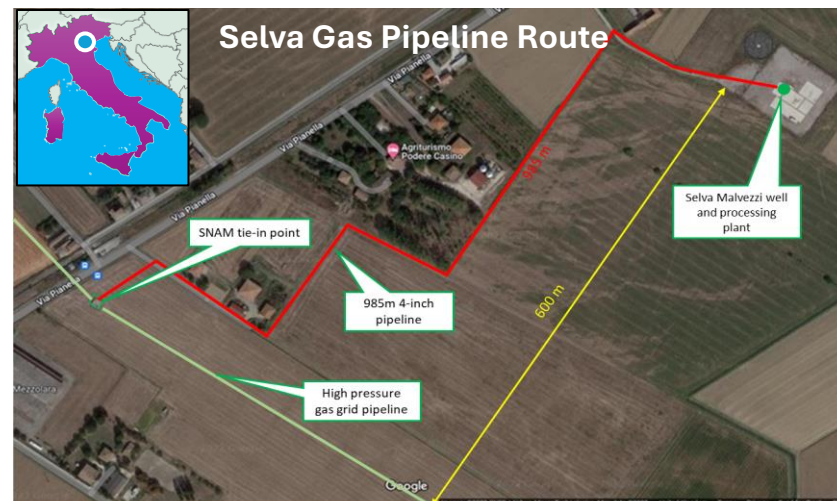

Strong Flow Rate

- C1 and C2 sands tested >150,000 scm/day in test (≈5.3 MMscfd)
- Plant designed to handle 150,000 scm/day (≈5.3 MMscfd)
- Pipeline can handle up to 250,000 scm/day
- Budget based on 80,000 scm/day (≈2.8 MMscfd)

Catalyst to Re-Rating

- Has increased net production by 3 to 4 times
- Generates free cash and allows exploration & development of wider portfolio

SELVA PROVEN GAS RESERVES

- Oct 2017 • PXEN farmed-in to 17%
- Dec 2017 • Podere Maiar (PM-1) discovery well drilled
- Jan 2018 • Well tested gas to surface from 2 intervals
- Apr 2022 • Completed acquisition of UOG's 20% working interest in Selva, brings PXEN interest to 37%
- May 2023 • 4-inch pipeline connects the PM-1 well to the SNAM gas grid
- Ongoing • Drillable prospects will be optimised and de-risked with new 3D survey prior to drilling
- Ongoing • Four drilling targets being primed for the EIA and final drilling permits - Selva North, Selva South, East Selva and Riccardina

2019 CGG CPR categories ^[1]	Selva Malvezzi (Bcf) - Gross	Net to PXEN (Bcf @ 37%)
Reserves (2P)	13.4	5.0
Contingent Resources (2C)	14.1	5.2
Prospective Resources (Best Estimate)	88.2	32.6

[1] Source: CPR - CGG Services (UK) Limited – July-2022

SELVA MALVEZZI PRODUCTION CONCESSION UPSIDE 4 WELLS FOR PERMITTING TARGETING 88 BCF (GROSS)

Surface well locations and subsurface targets identified for four new wells to be drilled on the concession

1. Selva North and Selva South

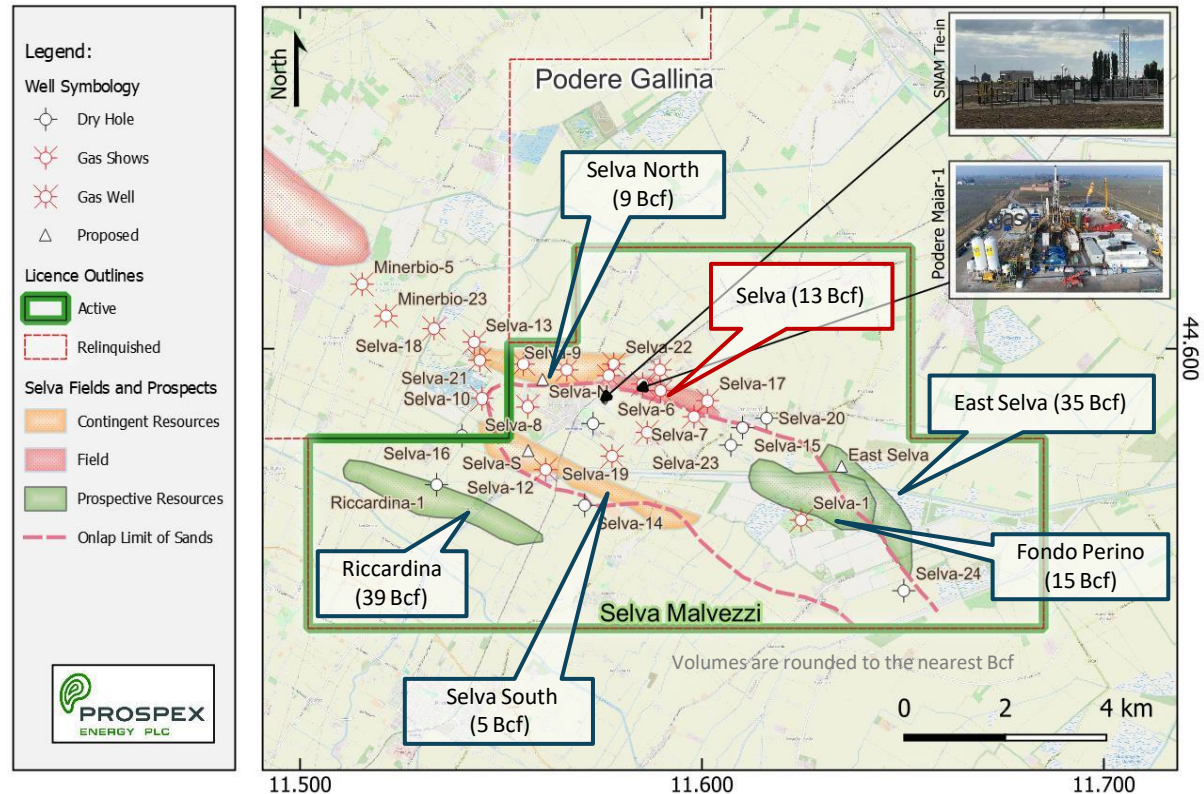

- Stratigraphic pinch-outs in the same style as Podere Maiar-1 (Selva)
- CGG CPR [1] upgraded to Contingent Resources following the success of Podere Maiar-1 with combined 1C/2C/3C of 5/14/31 Bcf (Net 2/5/11 Bcf)
- Environmental and drilling permitting initiated

2. East Selva

- Same interval as Podere Maiar-1, but separated by a structural saddle
- Lo/Best/Hi Gross Prospective Resources of 29/35/41 Bcf (Net 11/13/15 Bcf)[1] The dashed red line shows the mapped onlap of the reservoir (Pleistocene C) against the fold and can be followed from Selva to East Selva
- Environmental and drilling permitting initiated

3. Riccardina

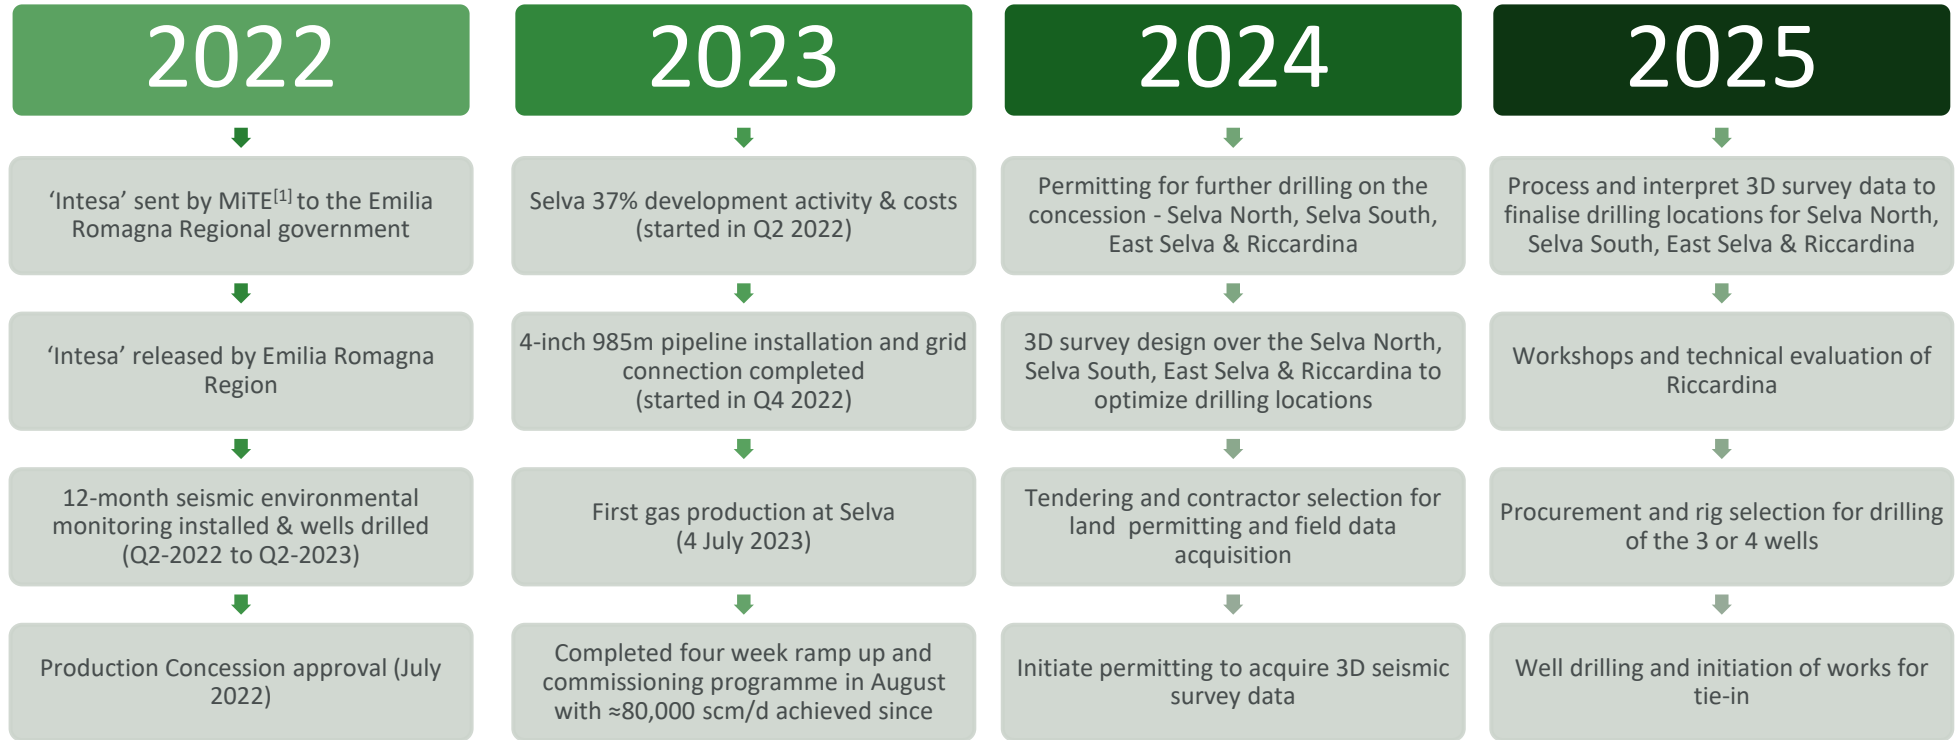

- Higher risk deeper prospect with Lo/Best/Hi Gross Prospective Resources of 13/39/129 Bcf (Net 5/14/48 Bcf)[1]

[1] Source: CPR - CGG Services (UK) Limited – July-2022

SELVA MALVEZZI TIMELINE

[1] 'MiTE' is the Ministry for Ecological Transition now called Ministry of Environment and Energy Security ('MASE')

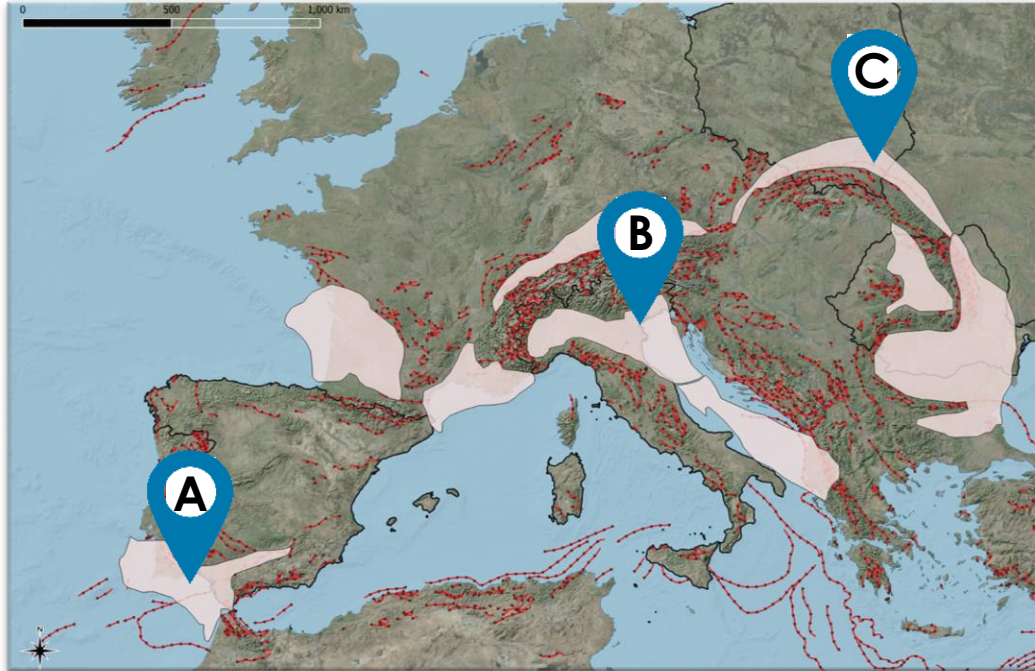

POLAND – LICENCE APPLICATIONS

**Prospect has pre-qualified to apply for licences onshore in Poland
Applications have been submitted at 100% Working Interest initially
If successful licences could be awarded by Q1 2025**

TECHNICAL RATIONALE TO BE IN POLAND

PROSPEX's FOCUS AREAS are inside FORELAND BASINS, which typically host Tertiary turbidite sandstone reservoirs charged with gas

THE RATIONALE BEHIND APPLYING FOR ACREAGE IN POLAND IS BASED UPON:

- Low geological risk, since reservoirs and seals tend to be deposited as a single event
- Shallow depth and hence inexpensive drilling, due to their young geological age
- Allow for hedging commercial and political risk due to their wide extent in Europe
- Excellent Fiscal Regime with conditions and favourable business climate for gas development

SPAIN: VIURA, EL ROMERAL & TESORILLO

Prospect owns a 7.24% interest in the Viura gas field
(81.25% owned by Heyco Energy Group and operated by HEYCO Energy Iberia)

Prospect owns a 49.9% interest in the El Romeral concessions & gas to power plant
(50.1% owned by Warrego^[1] and operated by Tarba Energía)

Prospect owns a 15% interest in the Tesorillo Exploration Permit
(85% owned by Warrego^[1] and operated by Tarba Energía)

INVESTMENT PORTFOLIO: SPAIN

Viura

- 7.24% Owned by PXEN, including infrastructure
- Large gas field, estimated >90 Bcf recoverable gas
- High production rates achieved from modern wells
- In production, producing from wells V-1ST3 & V-1B
- Development well V-1B completed in Dec-2024
- Gross production now more than 300,000 scm/d
- Two new development wells to be drilled in Q2 2025
- Operated by HEI

El Romeral 1,2 and 3

- 49.9% Owned by PXEN, including infrastructure
- Several small to mid-sized gas fields typically 2-5 Bcf
- In production, producing from 2 wells
- 8.1 MW power plant operates 24/7
- Hybridised with solar panels
- Adding reserves with 5 new wells, awaiting permits
- Further 5 MW photovoltaic project in permitting process
- Operated by Tarba Energía

Tesorillo and Ruedalabola

- 15% Owned by PXEN, with option to increase to 49.9%
- Exploration project with large mid case prospective resources (830 Bcf)
- One well already tested gas on the concession, in 1957
- Currently suspended from a voluntary request in 2015
- Requested to merge and simplify the 2 concessions in 2021
- Awaiting reinstatement
- E&P programme already prepared
- Operated by Tarba Energía

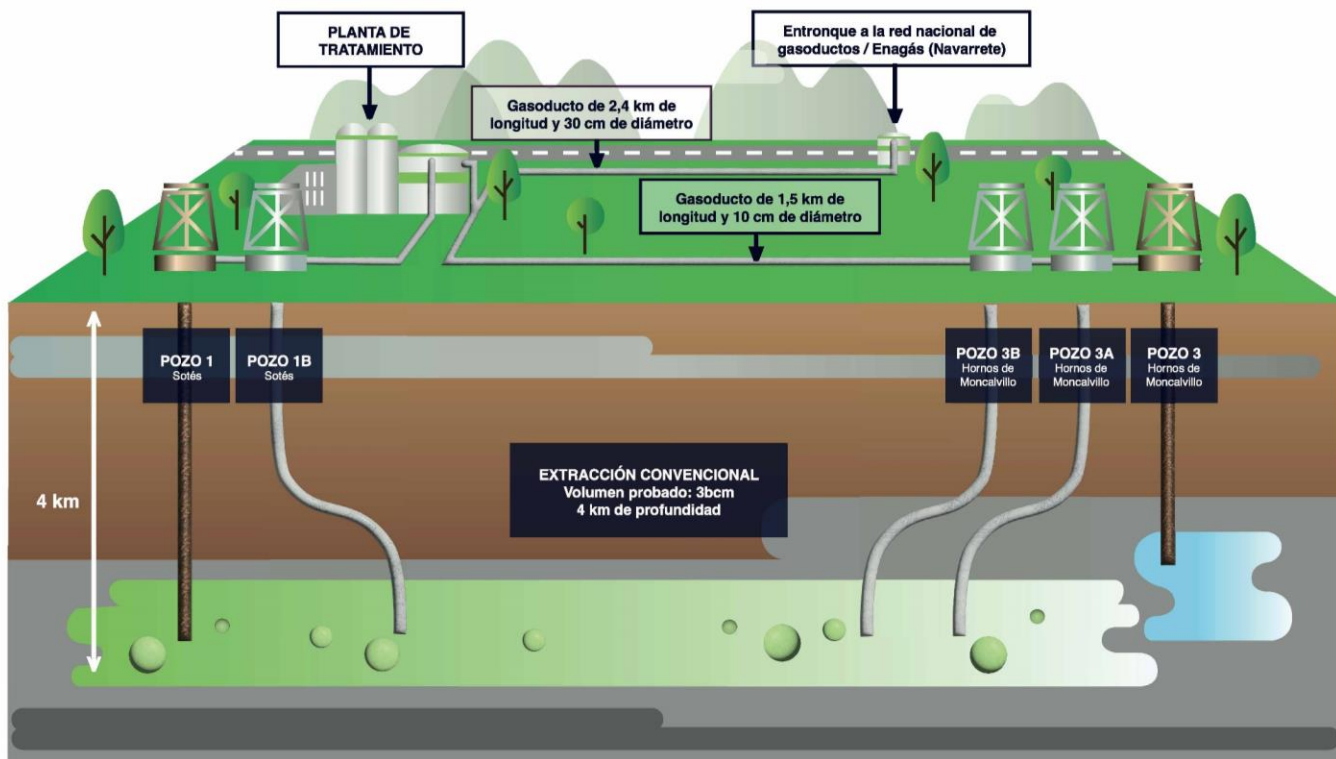

VIURA - NORTHERN SPAIN 90 BCF GAS FIELD IN PRODUCTION

- The Viura Gas Field is located in the Province of La Rioja, Northern Spain and is operated by HEYCO Energy Iberia ('HEI')
- PXEN acquired 7.5% of HEI including the interest in the Viura concession, existing production and surface facilities. PXEN owns a resultant interest of 7.24% in Viura
- Viura estimated gross remaining reserves is 90 Bcf (2.5 Bcm) which is 6.5 Bcf (0.18 Bcm) net to Prospex
- Prospex has contributed to the funding of the 2024/2025 development programme, including the Viura-1B well, at a cost of £4.05 million which is 15% of the estimated £26.96 million total costs in 2024
- Prospex's 15% share of the 2025 development programme is estimated at a further £4.84 million, which is to be funded by future cash calls or from Phase 1 production or both

VIURA PROJECT SCHEMATIC

VIURA GAS PLANT & DRILLING RIG FOR VIURA-1B WELL

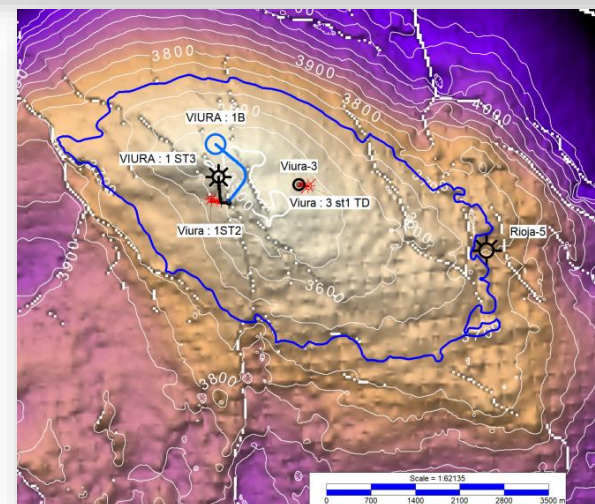

VIURA - NORTHERN SPAIN

90 BCF GAS FIELD IN PRODUCTION

- The Viura gas field was discovered in 2010 with well Viura-1 (TD 3,788m), which tested with a HPHT reservoir $P > 500$ bars, delivered a maximum flow rate above 500,000 scm/d and was placed into production at 110,000 scm/d
- Viura-3 was drilled nearby in 2013, also giving excellent gas shows
- A 3D seismic survey completed in 2013 year revealed a presence of a large 4-way closure with estimated gas in place of 210 Bcf
- In February 2015, the first natural gas sales to the national grid started, but only in March of that year the permanent commercialisation started
- On 25 July 2017 the Spanish official state gazette (BOE) published the Royal Decree granting the Hydrocarbons Exploitation Licence for the VIURA project, covering 20,227.20 ha, until the 25 July 2047
- The Upper Cretaceous reservoir (Utrillas formation c.150m thick) is made of fan-delta sandstones with interlayered shales with top of the reservoir @3,550 m depth TVDGL
- It has a moderate matrix porosity of 5-8% and permeability of 11-32 mD, possibly enhanced by fractures, all efficiently sealed by Tertiary sediments above
- Producing gas with minor condensate cut (3.5 stb/MMscf)

EL ROMERAL PRODUCTION AND DEVELOPMENT

HISTORY

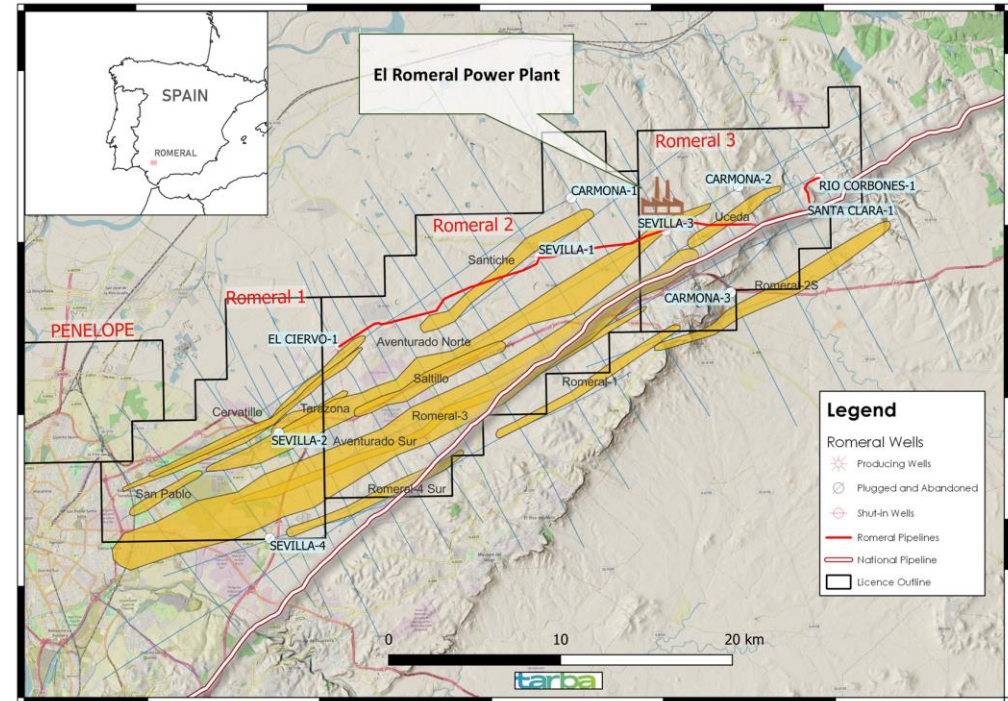

- Since 1983, 7 wells drilled resulted in gas discoveries
- 5 went on production from 2002
- 2 proven undeveloped discoveries (thus contingent resources)

PRESENT

- Production from 2 wells
- High electricity prices
- 26-inch ENAGAS pipeline traverses the three Romeral concessions
- El Romeral power station, successfully upgraded to work 24/7

NEAR FUTURE

- 11 very low risk prospects targeting 90 Bcf^[1] (Best estimate prospective resources)
- EIA initiation document already submitted for drilling the first five wells
- Expecting update from the regulator before year end
- Rig will be mobilised to drill the first five wells as soon as the permits to drill are granted
- Rig review for future mobilisation ongoing
- Two new wells with production of 25,000 scm/d will take the plant to 100% utilisation

Over 500 km of 2D seismic and AVO by Chevron and Repsol
Dataset provides in depth basin insight and lowers play risk

SOUTHERN SPAIN - EL ROMERAL 1, 2 & 3 CONCESSIONS 5 WELLS FOR PERMITTING, TARGETING 18.2 BCF

EL ROMERAL

ESG & BUSINESS DEVELOPMENT OPPORTUNITIES

ACTIVITY	TIMINGS (post Q2 2024 indicative)
✓ Environmental Initiation consultation for 18 new infill gas wells, 5 permits to drill submitted	Q2 2021
✓ Project Apollo - Solar panels installed on power plant roof (payback in 4 years)	Q3 2022
✓ Environmental Impact Assessment submitted and detailed well proposals to permit the drilling of 5 gas wells	Q2 2024
Project Helios – 5 MW array of photo-voltaic panels on adjacent land (cost est. €3.1m- €3.4m)	Q4 2024 – Q4 2025
Authorisation for drilling consent on receipt of environmental approvals and permits – 5 wells	Q4 2024
Drilling 5 natural gas wells, completions, pipelines & tie-backs	Q1 2025 – Q3 2025
El Romeral pipeline connection to 26-inch Enagas pipeline network (cost est. ≈€3m)	2025 – 2026
Gas Storage Opportunity for existing non-producing wells	2026 - 2030

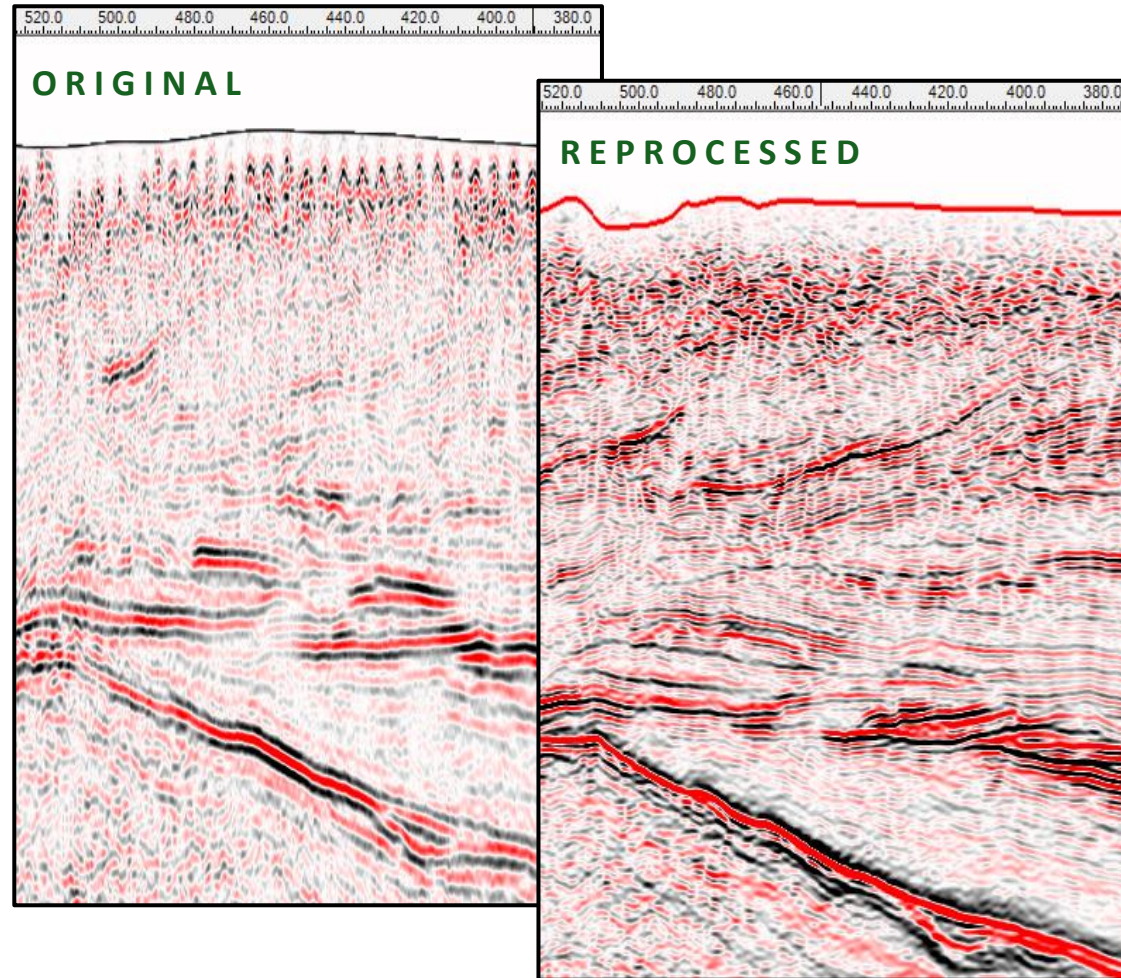

Sources: PXEN Estimates, contractor quotes

EL ROMERAL SEISMIC PROCESSING

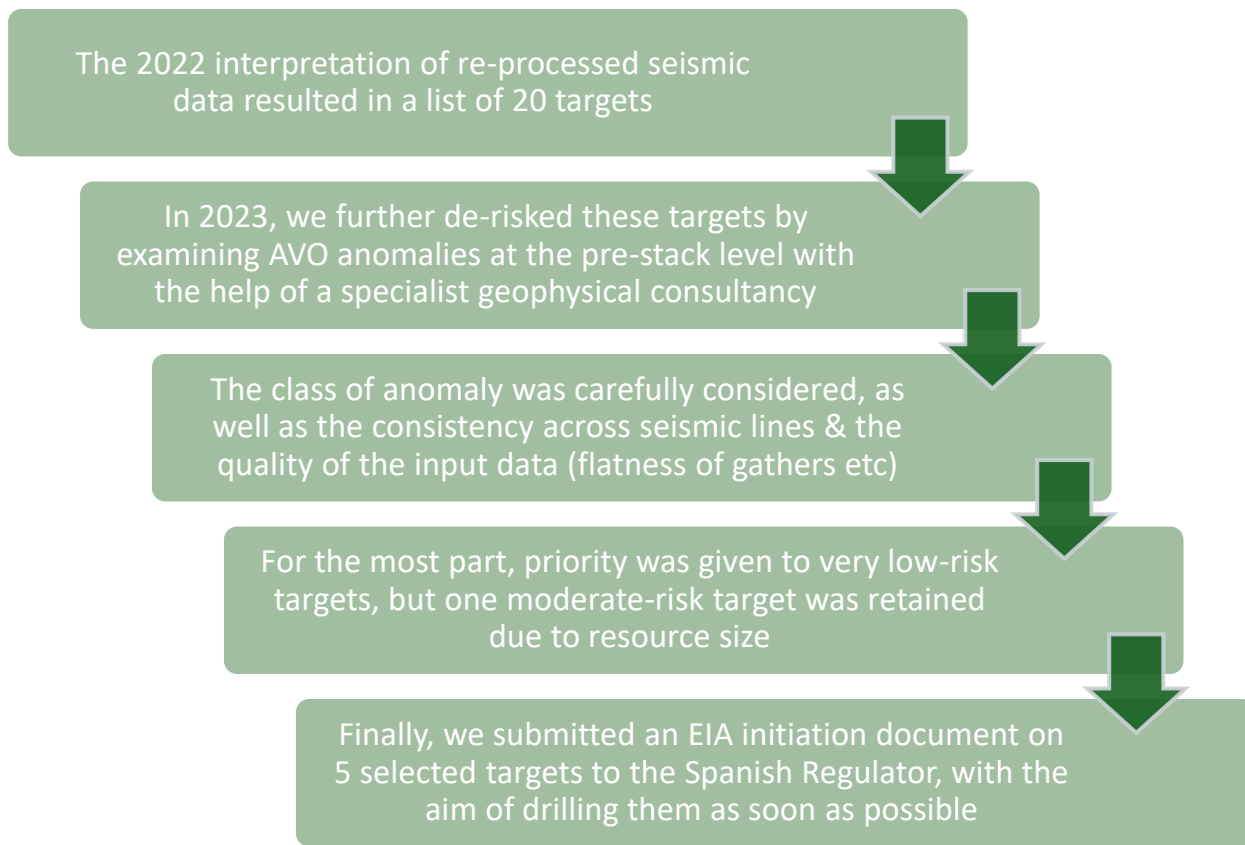

- Full reprocessing of El Romeral 2D Seismic using modern, broad bandwidth processing flow and new methods for noise attenuation
- Resulted in a significant uplift of imaging quality
- Project was delivered on time and in budget
- Re-interpretation is now complete, and a shortlist of prospects has been compiled
- AVO products were included in the reprocessing, as they have been instrumental in revealing the presence of gas in the past

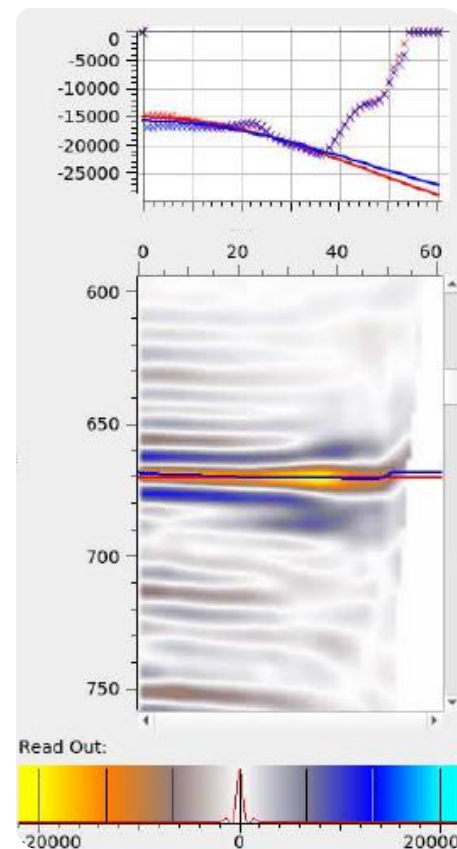

EL ROMERAL PROSPECT DE-RISKING

High-grading the prospects from the 2022 interpretation

Examining the seismic amplitude with increasing angle, at gathers

EL ROMERAL GAS READY FOR DEVELOPMENT

LOCAL PIPELINE NETWORK

CAPACITY AT PLANT FOR MORE GAS

- These volumes are from the June 2019 CPR and will be updated on completion of a new CPR
- New structures have also been identified

*Source: NETHERLAND, SEWELL & ASSOCIATES (NSAI) CPR – June 2019

TESORILLO

Low Risk Exploration

- Contains the Almarchal-1 gas discovery well (drilled in 1957) which logged 212m of net gas pay
- Multiple DST's flowed gas to surface*

Large defined share structure

- Operated by Tarba Energía (85% Warrego : 15% PXEN)
- PXEN option to increase to 49.9% for €1.725m ahead of drilling a well

Certified Resource Validation

- Tesorillo holds independently certified NSAI Gross Prospective Lo/Best/Hi Resources of 219/831/2,288 Bcf*

Pipeline Access

- Close to infrastructure with easy gas monetisation
- 48-inch Maghreb to Europe gas pipeline with excess capacity 3km from well location

Licence Activity

- EIA Initiation Document submitted Q4 2021 & awaiting feedback
- Exploration Permit currently suspended & awaits Ministry resolution and reinstatement as a production licence
- Reinstatement as Exploitation Concession submitted in May 2021

- Prospex owns 15% of Tesorillo (Warrego 85%)
- Prospex option to increase to 49.9%

Cadiz Province, Southern Spain, over 380 km² of surface area

OUTLOOK & OBJECTIVES

2024/2025 TIMELINES

2024		2025			
Q3	Q4	Q1	Q2	Q3	Q4

POISED FOR GROWTH

GROWTH IN ITALY

- The 37% interest in Selva Malvezzi is projected to generate net post-tax post-royalty cashflows of €2.6 million per year, according to the CGG CPR, calculated at 2019 gas prices
- Using current forward curve gas price predictions (ICE TTF) the 2024 net annual post-tax, post-royalty cashflow figure is in excess of €4 million, according to PXEN calculations
- Applications for the environmental and drilling permits to drill four additional wells on the Selva production concession are being prepared with the target of drilling in 2025

GROWTH IN SPAIN

- Major new project (Viura) in La Rioja. Bought in at the right time, significantly increased our reserves
- Five low-risk gas wells identified in our application for permitting to the Spanish Regulator in the Romeral concessions Environmental Impact Assessment study is with statutory consultees for award of drilling permits
- Major undeveloped natural gas discovery from 1957, awaiting re-drill in Tesorillo, when the regulator re-activates the permit
- Solar energy
 - Solar panels installed on the roof of the power plant in August 2022
 - Tendering complete for the installation of a 5MW array of photo-voltaic panels on land leased adjacent to the El Romeral plant in preparation for project execution

THE BOARD

Mark Routh

CEO & Managing
Director

Mark is a Petroleum Engineer with more than 40 years of experience in the oil & gas industry. He has an MSc in Petroleum Engineering. He spent eight years as CEO/Chairman of AIM quoted IOG plc and seven years as Chairman/NED of Warrego Energy Ltd. Founded CH4 Energy in 2002, which focused on gas in NW Europe – sold for £152m after four years. Prior to CH4 Mark spent ten years with Hess, six years with BP and five years with Schlumberger in SE Asia and the North Sea.

Bill Smith

Non-Executive
Chairman

Bill is a Canadian solicitor with 40 years of experience in corporate finance and is a director of a number of listed and private companies. He was a senior partner of McCarthy Tetrault LLP in Canada and was subsequently Executive Vice President of two listed international oil companies and a listed investment firm. He has extensive experience including a number of start-up ventures in the sector.

Alasdair Buchanan

Independent Non-
Executive Director

Alasdair has a BSc in Chemical Engineering and over 40 years of experience in the upstream oil and gas sector. Most recently he was Global Energy Director at Lloyds Register and was COO and a director of Senergy Group plc. Alasdair was a non-executive director of Warrego Energy from 2012-2019 prior to its public listing on the ASX. Alasdair worked for Halliburton for three years in Aberdeen and Texas, most recently as Vice President UK and worked for BJ Services for 28 years both in the UK and internationally.

Andrew Hay

Independent Non-
Executive Director

Andrew is a graduate of Oxford University and has more than 30 years of experience in corporate banking, the debt & equity capital markets and international M&A in London and New York. Currently a Senior Adviser at Smith Square Partners. Formerly Chairman of LGB Corporate Finance and led the corporate finance business of Edmond de Rothschild in London. Previously, Andrew held senior positions at ING Barings and Schroders. Until May 2017, Andrew was a Non-Executive Director of Aminex plc and was a Non-Executive Director of Independent Oil & Gas plc, until February 2018. Since 2020, he is the senior Non-Executive Director and chair of audit committee at Great Western Mining Corporation PLC, the AIM quoted mineral exploration and development company with licences and operations in Nevada.

MANAGEMENT TEAM

Mark Routh
CEO & Managing
Director

Mark is a Petroleum Engineer with more than 40 years of experience in the oil & gas industry. He has an MSc in Petroleum Engineering. He spent eight years as CEO/Chairman of AIM quoted IOG plc and seven years as Chairman/NED of Warrego Energy Ltd. Founded CH4 Energy in 2002, which focused on gas in NW Europe – sold for £152m after four years. Prior to CH4 Mark spent ten years with Hess, six years with BP and five years with Schlumberger in SE Asia and the North Sea.

Grant Glanfield
Group Head of
Finance

Grant is a Chartered Accountant with 35 years' experience in a broad range of financial, project and general management roles within Finance and Energy. Following a successful career in the City, in 2012 he moved into venture capital and to a CFO role for a pan-European E&P group of companies with operations primarily in the United Kingdom and Poland. He joined Prospec in 2018 and, aside from managing day-to-day group finance and administration aspects, contributes to the investment decision-making, execution and ongoing management processes.

Carlos Venturini
Chief Geoscientist

Carlos is a Petroleum Geoscientist (BSc) with an MSc in structural geology and near 40 years' experience in G&G, interpretation and prospect generation gained with Schlumberger, ENI, Sipepol, and his own Libya-based consultancy working for Petrobras, GDF and OMV amongst others. He has worked in more than 30 basins and 3 continents and is an expert in Mediterranean and African petroleum geology.

Paweł Żuk
Country Manager
Poland

Paweł is a seasoned Country General Manager having over 25 years of experience in the oil and gas industry. Since 2012, Paweł has led upstream business development and operations over several licenses across Poland. He served as company director for independent oil and gas groups that included Hutton Energy, Palomar Natural Resources and Gemini Resources. Prior to that Paweł spent fifteen years with Shell working in a number of commercial, business development and senior management roles in CEE and EU markets. He served as Managing Director and Country Head for Shell Poland.

Alecos Stavrou
Senior Geologist

Alecos holds a BSc in Geology from Durham university and an MSc in Petroleum Geoscience from Imperial College where he was awarded an industry scholarship by PGS. He has 9 years of experience in the industry, having worked for PGS, SASOL, PDF and now Prospec Energy. He has undertaken more than 50 data rooms, with a focus on onshore European foreland basins and has led several technical projects within the company, including seismic reprocessing, petrophysical re-evaluations and AVO studies.

Tomasz Rosowski
Senior Reservoir
Geologist

Tomasz holds a Masters degree in Petroleum Geology from University of Science and Technology (Poland) and a Masters degree in Petroleum Engineering from Heriot-Watt University (UK). He has over 18 years of international experience in the industry. Strong interpretation and software modelling skills developed while fulfilling roles of an exploration and operations geologist. Skilled in formation evaluation, geological mapping, prospects generation, risk assessment and drill site supervision. Extensive knowledge of Polish geology gained while serving role of an exploration geologist for Hutton Energy and Prospec.

SUMMARY

Investment Case

- Secured reserves/commercial revenue generation
- Still trading at discount to recent analyst^[1] target price
- Huge potential NPV uplift from new projects
- Focused on shareholder growth

Unlocking Shareholder Value

- Diversified portfolio assembled
- Risk managed
- Multiple routes to significant shareholder value growth

European Focussed

- Focus on mature markets with existing infrastructure and available capacity
- Politically stable countries with desire to reduce foreign energy dependency and LNG importation
- Strong emphasis on onshore conventional gas

Strong Management

- Highly experienced team of technically led professionals
- CEO's proven track record of growing companies with more than 40 years in the oil & gas industry
- Strong Board with independent representation
